

Dear Jake,

I bet you're thinking, "Hey, who's that beauty with that beast?" It's my friend Dr. Tracey Sutton holding a huge chimera. Can you believe it's 5 feet long (That's 1.5 m)? It may be close to the biggest one ever found! That big spine is poisonous. The deep is full of crazy looking creatures, isn't it?

MORE COOL CRITTERS TO COME,
Tammy

PS Since it's such an unusual fish, I've noted some of its body parts

Jake, the SeaDog
